[1] - Carry out selective thinning, removing all trees marked on map with a scribed cross for removal. This equates to approximately 10% of tree cover. Stumps should be left at ground level and soft wood stumps treated by spraying with urea.
[2] - Oak - reduce longest overhanging laterals by no more than 4m in length, all adjacent sub laterals feathered back. All large sections of deadwood, down to a diameter of 20mm should be removed.
[3] - Woodland - Ensure scrub Elders and Brambles around base of Oak are controlled.
[4] - Woodland - Cut down Elder growth from woodland floor, retaining 4 or 5 groups of the most mature bushes.
[5] - Woodland - Cut and remove extending length of green Lonicera which extends into woodland area.
[6] - Woodland - Blue Cedar - Carry out a climbed inspection of the branches and unions, crown clean removing dead, diseased and crossing branches of Blue Cedar.
