

Dear Charlotte

Thank you for consulting Natural England on the Main Modifications. We have no further comments on the actual modifications.

However we are surprised that we have not been consulted over the draft recreational mitigation strategy. We understand the council is producing a memorandum of understanding with the RSPB, but this is not only a matter for the RSPB, as the Forestry Commission have already informed the council. You should be including all the relevant environmental organisations in the formation of a mitigation strategy.

Kind regards

Francesca
